WHY UZBEKISTAN?

Country Potential

Modern Uzbekistan is a leading industrial state in the heart of Central Asia, which ensures both stability and economic development of the whole region. The key factors for the success of doing business in Uzbekistan are: a rich resource base; an advantageous geographical location in the center of the largest regional markets; an integrated network of land and air communications of international importance; a transport and logistics system; a diversified industrial base and scientific, intellectual, and human resources of the republic. The total mineral resource potential of the country is approximately 3.5 trillion US dollars. In particular, Uzbekistan takes 11th place in the world in terms of copper reserves, 9th place in gold production, 8th in uranium reserves and 5th place in cotton fiber production. Favorable geographical position of the republic at the intersection of all trade routes, allowed development of multimodal network covering such markets like: Middle East, Northern India and western China. Uzbekistan has the possibility of duty-free access to the Central Asian market with a population of 60 million people and the CIS market with a population of 300 million people. The economy of Uzbekistan grew by 5.4% (up to \$ 35.3 billion) in the first half of 2022, while GDP per capita rose up to \$ 995 (+ 3.3%). Uzbekistan's real GDP growth in 2023 is expected to be 4.5-5% with further acceleration to 5-6% in 2024 and 6-6.5% in 2025. It is forecasted that the country's exports (excluding gold) will increase by 13-17% in 2023 and about 9-12% in 2024-2025. Re-export operations will occupy a significant place in the structure of exports. The continuation of this trend next year will be one of the factors affecting both the volume of exports and imports. Inflation is projected to decrease to 8.5–9.5% by the end of 2023, which will lead to the achievement of the inflation target of 5% in the second half of 2024.

Industry Potential

There is a strong positive trend within the framework of the jewelry industry of Uzbekistan.

On February 22, 2021, the Decree of the President "On measures to create favorable conditions for the further development of the jewelry industry" was signed. According to it, precious and decorative stones used by jewelers are exempted from customs duties; the license requirement for the temporary import and export of gold, silver and other raw materials, necessary for the creation of jewelry, is canceled; a procedure for the sale of precious metals to jewelry manufacturers on the basis of a direct contract or with a deferred payment condition is introduced; jewelry sale through e-commerce in the domestic and foreign markets is allowed; individuals are allowed to export jewelry worth up to 10 thousand dollars; other jewelry related commodities, raw materials, materials and components (pearls, diamonds, precious metals) are not subject to import customs duties (items HS code 7101-7104) except for customs clearance fees.

According to the World Gold Council: in 2020, Uzbekistan's gold exports amounted to \$5.8 billion or 40% of total exports and became the world's top gold supplier. In November 2021, Uzbekistan sold more gold than any other country in the world again. From January to August 2022, Uzbekistan increased its gold reserves by 19 tons. (According to Gold.org.) The country ranked fifth in the world in terms of gold reserves just behind India, Iraq, Egypt and Turkey. Now the gold reserves of Uzbekistan amount to more than 381 tons (59% of the total reserves).
